

26W AIR CIRCULATOR FAN

DCCFA1

This user guide offers a brief walkthrough of the circulator fan's features.
Please keep the guide in hand for future reference.

Still need help? Feel free to email us at support@drprepare.com

DON'TS WHEN USING THE FAN

Please read through this user guide before first use.

- It is forbidden to rinse the fan body directly with water.
- Do not turn off the fan by unplugging the power plug directly.
- Do not insert your fingers or other objects into the fan's front/rear guard, or running fan blades.
- Do not put hair, fabric, etc. near the fan to avoid being drawn in and causing danger.
- Do not spray cleaning liquid or pesticides on the fan to avoid damaging the casing surface.
- Not intended for persons (including children) who are physically or mentally disabled or lack relevant experience/skills, unless instructed by the person responsible for the product's safety.
- When it is not in use, turn off the power and unplug the fan.

Item	Air Circulator Fan
Model	DCCFA1
Rated Voltage	AC120V / 60Hz
Rated Power	26W
Net Weight	2.75 lbs / 1.25 kg
Product Size	10*8*11.6 in / 25.4*20*29.5 cm
Fan Blade Diameter	5.9 in / 15 cm

SAFETY PRECAUTIONS

NOTICE Please read this manual carefully before using the fan. The Company reserves the right to interpret the instructions. The appearance of the actual product shall prevail. In the case of product technology or software upgrades, there will be no prior notice.

1. Transportation

- When moving, be sure to shut off the fan and unplug the power plug.

2. Power Cord

- Do not pinch, bend or twist the AC power cord excessively, otherwise the cord could be exposed or broken.
- If the power cord is damaged, it must be replaced by professionals from the manufacturer, its maintenance department, or a similar department to avoid hidden risks.

3. Usage

- Please refer to the voltage and frequency ratings on the specification label before use, and ensure the supplied voltage is appropriate.
- In the case of abnormal sound, peculiar smell, high temperature, irregular rotation of the fan, or other abnormalities, please stop using the product immediately.

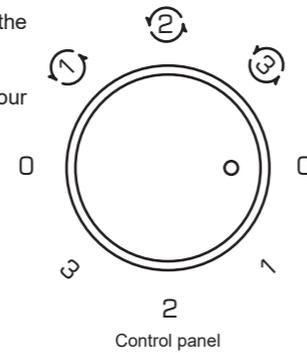

4. Warning (improper use may cause electric shock, fire, injury, and other damages)

- Do not use this product on unstable platforms where it may topple easily.
- Do not use this product in hot and humid environments (like bathrooms), and harsh environments.
- It is forbidden to store flammable or explosive materials around the fan body.

USE METHOD

1. Before plugging in, make sure the control knob is in the "0" position.
2. Plug in the power supply, and rotate the knob to your desired power mode, with or without auto-oscillation.

(The upper half control panel comes with left-to-right auto-oscillation, while for the lower half control panel, the fan does not oscillate.)

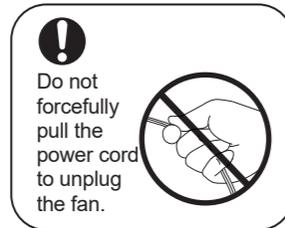

3. To change the fan's tilt angle, you can manually adjust the fan from -10deg to 90deg.

CLEANING AND MAINTENANCE

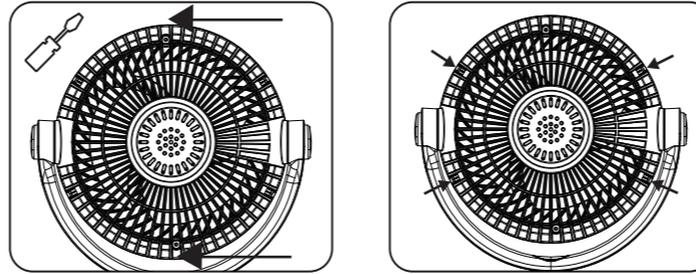

For easy cleaning, the front guard and fan blades can be disassembled.

WARNING

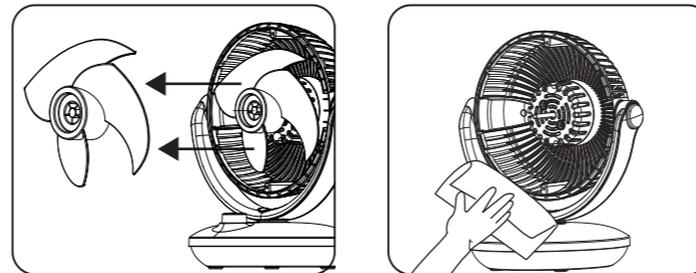

DISASSEMBLY & ASSEMBLY METHOD

1. Unscrew the two fixing screws on the rear guard with a screwdriver (not included).
2. Press the 4 rear guard buckles to remove the front guard.

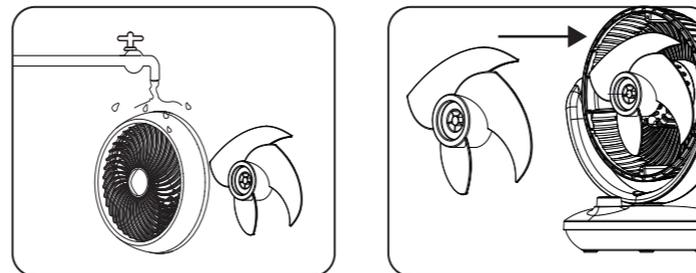

3. Then pull out the fan blades for cleaning.
4. Wipe the fan's motor and rear guard with a neutral detergent and a moist soft cloth.

5. The front guard and fan blades can be washed with water.
6. Wait until the front guard and fan blades have dried, then assemble the whole fan in the reverse order of disassembly.

Note: For assembly, please align the fan blades' slot and insert the pole to the bottom until it can't move further.

TROUBLESHOOTING

If the fan cannot work properly after the following rectifications, please contact the Dr. Prepare service team for help.

Fault Issues	Fault Reasons	Solution
The fan does not work	Dead electrical outlet	Change to a live socket
	Poor power cord connections	Connect the power cord firmly
Emits noise during operation	Dirty fan blades	Remove the front guard and clean the fan blades
	Loose fan blades	Fix the fan blades
	Motor failure	Contact our service team
The fan does not oscillate	Incorrect mode chosen	Please turn to the correct knob position
	Control knob failure	Contact our service team
Fan blades get stuck	The blades could be jammed by some objects	Unplug the fan and take out the objects
